Subject: FW: Notes about the Surface Sediment Weekly Report FW: Portland Harbor - Field Logs

Attachments: [SampleTracking_wDateCountDepth_rev20180504_toEPA.xlsx](#)

Hi John.

Attached is an expanded data report provided by the Pre-RD Group that summarizes their surface sediment sampling to-date.

Please take a look at this and see if you note any issues/deficiencies. They are to be providing this to us weekly.

We note that the spreadsheet doesn't describe the material for each grab nor does it identify which reason for multiple attempts for each grab (if marked for more than one), but we recognize providing this info would make the spreadsheet pretty unwieldy.

The Pre-RD Group said they will be sharing their field notes on a share-point site that should be made available to Davis and he will route the field notes to us.

I see the best use of this spreadsheet summary is to identify the problem areas and allow us to focus in on the field notes for those particular locations.

Let us know if you see anything that could be improved/added to the spreadsheet.

Thanks!
Scott

Subject: Notes about the Surface Sediment Weekly Report FW: Portland Harbor - Field Logs

Davis,

A few notes about the transfer of the weekly report about the Surface Sediment collection data:

As we've discussed, this is the first of the weekly reports of the Surface Sediment tracking data. Beginning next week we intend to upload the data into a sharepoint site dedicated for the purpose of data transmission to the EPA. We will send instructions about how to access the site early next week.

In the meantime, we are transmitting this week's report with the following notes:

- You should have received the below email with a link to the field logs (caution it's a large file)
- Attached to this email is the tracking spreadsheet in native format (as you requested)
- As we discussed, the accompanying maps will be sent on Monday without the privilege statement

Give me a call if you have any questions.

Danni Kline has sent you 1 file using AECOM's File Transfer System.

Danni Kline says:

Davis,
Ken asked me to send you these Field Logs from sampling activities conducted between March 30 and May 2, 2018.

Starting next week, we will be using the SharePoint site to transfer files
Please contact Ken if you have any problems accessing this file (281-244-2793).

Thank you,
Danni

This file will be available for download until 5/11/2018

File	Description	Size
Surface sediment Sampling Logs QC'd 033018-050218.pdf		111,780KB
